Republican Majority in County 1,971

That there are nearly 2,000 more Republicans in Marion County than there are Democrats is indicated by the report of registration statistics just completed by Lee N. Satterfield, clerk of the

County Court.

The total number of Republicans registered is 13,144 while the number of Democrats is only 11,173, leaving a Republican majority of 1,971 in the primary registration. There are registered also 322 Socialists, 88 Prohibitionists and 2,461 non-affiliated voters. This makes a total of 27,188

of these 12,230 are women and 14,958 are men giving the men a majority of 2,728 in Mar-

Of these 12,230 are women and 14,558 are men, giving the men a majority of 2,728 in Marion County. The proportion of women to men runs about the same in all seven districts and in not a single one are more women voters registered than men.

Republicans claim all except two districts, Grant and Paw Paw. A non-affiliated vote of 1,011 will play a big part in deciding the general election in Fairmont District. Should this vote go Democrat, the Democrats would carry Fairmont District, but should it go Republican, the Republicans would carry the county easily

The same may be said to be true of the non-affiliated vote in other districts. By winning this vote, the Democrats may carry the county; losing it, they will be defeated here by a large figure
